

# CORROSION<sup>X</sup> SAND BLAST

**TURNS CONCRETE INTO SAND FOR EASY, NONHAZARDOUS REMOVAL**

## **INTRODUCING Corrosion<sup>X</sup> Sand Blast**

**SAND BLAST** is the easiest way to remove hardened concrete from trucks, forms and roadworking equipment. Just apply **SAND BLAST**, and within a short period of time, leftover concrete is chemically transformed into sand for easy removal.

- Nonhazardous and biodegradeable
- No harsh acids
- No harmful fumes
- Removes large deposits of dried concrete quickly and easily

### **DIRECTIONS**

**DILUTE: SAND BLAST** can be used full strength or diluted as much as 4:1 with water depending on the thickness of the concrete to be removed and the amount of time **SAND BLAST** can work before the vehicle or equipment must be returned to service.

**SPRAY OR BRUSH ON:** Apply **SAND BLAST** liberally to any residual dried concrete left on vehicles, forms and equipment. Let the product sit for at least 15 minute – or longer in the case of thicker deposits. Product can be left on overnight to minimize cleanup effort. If left on overnight, re-wet surface with **SAND BLAST** prior to rinsing, brushing, etc.

**RINSE, BRUSH OR WIPE OFF:** Once concrete has been transformed into sand, it can easily be removed by rinsing with water, pressure washing, brushing, or wiping off with a rag or towel.

### **SAFETY PRECAUTIONS**

- **KEEP OUT OF REACH OF CHILDREN**
- Only use outdoors or in well ventilated areas indoors.
- Store product in closed, properly-marked containers when not in use.
- Refer to MSDS for complete safety information prior to using this or any other chemical product.

part # 23001

<b>PART No</b>	<b>Size</b>	<b>DESCRIPTION</b>	<b>QTY. per case</b>
22602	30 gallon	CX Sand Blast	1
22601	55 gallon	CX Sand Blast	1

**All Products 100% Made In The USA**
